

Crown Laboratories, along with our affiliated companies, has a long-standing heritage in skin care, and we are passionate about providing consumers and clinicians with innovative solutions for the skin. As our mission states, we are committed to developing and providing a diverse portfolio of pharmaceutical and consumer products that improve the quality of life for our customers.

With consumer brands like Blue Lizard Australian Sunscreen, Vita Liberata, and more, we offer best-in-class sunscreens, self-tanning lotions, moisturizers, cleansers and oral care products. Our prescription products provide healthcare professionals with solutions for managing a variety of skin conditions. With the recent addition of Bellus Medical, we are now a leading innovator in aesthetics. We are excited about our future, as we grow to become an innovative leader in the dermatology, skin care, and aesthetics industries while enriching the lives we touch.

We are currently recruiting for a Research Scientist to join our Product Development team, responsible for the ongoing analytical support of research and product development initiatives to support the growth of our brand portfolio.

Primary Responsibilities:

- Developing and/or validating analytical test methods as directed by a protocol, write and review test methods and/or development reports.
